

System:3[®] Mod Media[™]

Filters—SM Series

by Sta-Rite

One cleaning for an entire season?

System:3 Mod Media filters from Sta-Rite handle 2–3 times more dirt than other filters to deliver maintenance-free performance for up to a full season. Featuring perfectly balanced flow and an integral manifold design, these filters are engineered to deliver the ultimate in labor savings. System:3 Mod Media filters are ideal for inground pools, inground hot tubs and water features.

- Balanced-flow tank hydraulics direct water through each side of the filter module for uniform dirt loading, no cloggin and long, unattended operation.
- Complete media coverage combined with shallow pleats for greater dirt-holding capacities, longer filter cycles and less cleaning.
- Shallow pleat design also permits quick and thorough cleaning—just rinse the module with a hose.*

* Modules used in conjunction with certain pool/spa sanitizers may require soaking in special cleaning solutions.

An Eco Select[®] Brand Product

Water flows very efficiently through the System:3 Mod Media filter, often allowing the use of smaller pumps or lower pump speeds to minimize energy use. And when you rinse cartridges rather than backwash, you can significantly reduce water use, too. The Eco Select brand identifies our “greenest” and most efficient equipment choices.

As the global leader in pool and spa equipment manufacturing, we strive to provide greener choices for our customers. We hope you'll join us in embracing more eco-friendly poolsapes by choosing Eco Select branded products for your swimming pool.
